WHAT SETS US APART

Nearly Two Centuries of Command Experience: Our unmatched team brings over 195 years of combined law enforcement expertise to every case. Our roster is comprised of former Chiefs of Police, SWAT Commanders, Homicide Detectives, and specialized gang/narcotics veterans who have commanded thousands of personnel and overseen large-scale investigations.

An Arsenal of Exclusive data: Unlike typical private investigators limited to a single public source, Raptor leverages a comprehensive data infrastructure of multiple, proprietary national databases. We cross-reference dozens of data points across every state to uncover critical intelligence that standard agencies simply cannot access.

Active Engagement & Advocacy: We are relentless advocates for our clients. We do not stop at identifying the problem; we utilize our deep law enforcement relationships and private person's arrest powers to ensure offenders are held accountable. We hand over fully complete, case-ready intelligence packets to our law enforcement partners to ensure seamless prosecution.

Total Asset Dominance: From deploying bait-wire tracking to erecting 25-foot mobile overwatch towers in the middle of a 500-acre ranch, our technological footprint is unmatched. We engineer environments where crime is virtually eliminated before a lock is ever cut.

Customer-Centric Focus: We are dedicated to listening to and understanding our client's needs with utmost precision. Leveraging advanced technology, diligence, and hard work, we provide tailored solutions, always placing your safety and peace of mind at the forefront.

WHY CHOOSE RAPTOR?

At Raptor Investigations and Protection Services, we don't observe and report—we solve problems. Raptor Investigations is not a traditional agency; we are a privatized detective division and tactical consulting firm. Backed by 195 years of command-level law enforcement experience, we bring an unmatched arsenal of proprietary national databases, thermal drone operations, and elite surveillance technology to every case. We don't just identify threats—we actively engage, track down stolen assets, and deliver case-ready intelligence directly to law enforcement. When typical agencies hit a wall, Raptor breaks through it.
